Abstract

Emacs enables an unparalleled level of customisation by allowing the introspection of every variable and function that can be understood by the software. The possibilities are endless.

1 Preliminary setup

1.1 Garbage collection

Increase the garbage collection limit.

```
(setq gc-cons-threshold 100000000)
```

1.2 Custom file

Load settings created automatically by GNU Emacs Custom. (For example, any clickable option/toggle is saved here.) Useful for fooling around with M-x customize-group <package>.

```
(setq custom-file "~/emacs.d/blendoit/custom/custom-file.el")
(load custom-file)
```

1.3 Shortcut

We begin by defining a user shortcut to this very file:

```
(defun find-init-blendoit ()
  "Jump to this very file."
  (interactive)
  (find-file "~/emacs.d/blendoit/init-blendoit.org"))
(global-set-key (kbd "C-c c") 'find-init-blendoit)
```

1.4 Backups

Backups are so important that they should be described right after the shortcut to this file.

```
(setq backup-directory-alist '(("." . ,temporary-file-directory))
  auto-save-file-name-transforms '(("." ,temporary-file-directory t))
  backup-by-copying t ; Don't delink hardlinks
  version-control t ; Use version numbers on backups
  delete-old-versions t ; Automatically delete excess backups
  kept-new-versions 20 ; how many of the newest versions to keep
  kept-old-versions 5 ; and how many of the old
)
```

1.5 Secrets

```
(setq user-full-name "Marius Peter"
      user-mail-address "blendoit@gmail.com")
```

2 Bindings

```
(global-set-key (kbd "C-c e") 'eval-buffer)
(global-set-key (kbd "C-s") 'save-buffer)
(global-set-key (kbd "C-b") 'ibuffer-sidebar-toggle-sidebar)
(global-set-key (kbd "C-w") 'kill-buffer-and-window)
(global-set-key (kbd "C-c a") 'org-agenda)
```

2.1 Zoom

Zoom in/out of selected buffer.

```
(global-set-key [M-mouse-4] 'text-scale-increase)
(global-set-key [M-mouse-5] 'text-scale-decrease)
```

3 Packages

List of package archives.

```
(require 'package)
(add-to-list 'package-archives '("melpa" . "http://melpa.milkbox.net/packages/") t)
(add-to-list 'package-archives '("org" . "http://orgmode.org/elpa/") t)
(package-initialize)
```

Ensure use-package is installed.

```
(unless (package-installed-p 'use-package)
  (package-refresh-contents)
  (package-install 'use-package)
  (eval-when-compile (require 'use-package)))
(setq use-package-always-ensure t)
```

3.1 Org

Phew, I can finally introduce Org mode! I am so **excited**.

```
(setq org-hide-emphasis-markers t)
(setq org-startup-indented t)
(setq org-directory "~/org")
```

```
(font-lock-add-keywords 'org-mode
'(("^ *\\([_-]\\)"
  (0 (prog1 () (compose-region (match-beginning 1) (match-end 1) "•"))))))

(use-package org-bullets
:config
(add-hook 'org-mode-hook (lambda () (org-bullets-mode 1))))

(let* ((variable-tuple
(cond ((x-list-fonts "Liberation Sans") '(:font "Liberation Sans"))
      ((x-family-fonts "Sans Serif") '(:family "Sans Serif"))
      (nil (warn "Cannot find a Sans Serif Font.  Install Source Sans Pro."))))
      (base-font-color (face-foreground 'default nil 'default))
      (headline '(:inherit default :weight bold)))

(custom-theme-set-faces
'user
'(org-level-8 ((t (,@headline ,@variable-tuple))))
'(org-level-7 ((t (,@headline ,@variable-tuple))))
'(org-level-6 ((t (,@headline ,@variable-tuple))))
'(org-level-5 ((t (,@headline ,@variable-tuple))))
'(org-level-4 ((t (,@headline ,@variable-tuple :height 1.1))))
'(org-level-3 ((t (,@headline ,@variable-tuple :height 1.25))))
'(org-level-2 ((t (,@headline ,@variable-tuple :height 1.5))))
'(org-level-1 ((t (,@headline ,@variable-tuple :height 1.75))))
'(org-document-title ((t (,@headline ,@variable-tuple :height 2.0 :underline nil)))))

(custom-theme-set-faces
'user
'(variable-pitch ((t (:family "Liberation Sans"))))
'(fixed-pitch ((t (:family "Hack")))))

(x-list-fonts "Hermit")
```

- Beautiful bullet lists in Org mode!

3.1.1 Org Agenda

3.1.2 Org publish

(require 'ox-publish)

4 Cosmetics

4.1 Faces & cursors

In order to imitate other modern text editors, we'll resort to a blinking bar cursor.

4.1.1 Default cursor

```
(setq-default cursor-type (quote bar))
```

4.1.2 Default faces

Fixed-pitch and variable-pitch fonts will be used intelligently in all text modes.
